

INDEX TO ECOLOGY, VOLUME 59, 1978

A

Abbott, I. J., article, 1137
 Abbott, L. K., article, 1137
 Acclimatization, 1091
Acer Rubrum, 180
Aconitum, 672
 Acrididae, 779
Acroncuria, 1023
 Activity, 897
 Actual evapotranspiration, 465
 Adaptation, 641, 1189
 Adaptive strategy, 228
 Adenosine triphosphate, 1200
 Affinity, 194
 African buffalo (book review), 197
 African ungulates (book review), 197
 Age-specific interactions, 552
 Aggression, 285, 565, 1123
 Air pollution (book review), 202
 Alberta, 400, 966
 Aleutian Islands, 822
 Alexander, M., article, 140
 Allaby, M., reviewed, 1294
 Allan, M., reviewed, 1081
 "Allee" effects, 1289
 Allelochemic, 221
 Allomane, 221
 α -selection, 1289
 Amphibia, 1039
 Anaerobic heterotrophy, 1200
 Analysis, 117
 Anderson, D. R., article, 190
 Anderson, J. M., ed., reviewed, 633
 Anderson, M. G., article, 154
 Anderson, W. L., reviewer, 1084
 Annual, 596
 Annual type, 336
 Ant, 235, 449, 686
 Ant-garden, 449
 Ant-plant, 449
 Anura, 1039
 Anurans, 789, 1014
 Aphids, 1164
 Apical meristem, 986
 Apidae, 1123
 Apostatic, 297
 Application of vegetation science to grassland husbandry (book review), 865
 Aquatic, 481
 Aquatic habitats, 1211
 Aquatic insect larvae, 1023
 Aquatic macrophytes, 154, 1075
 Araneae, 309
 Archie, J. W., article, 126
 Argentina, 235
 Arizona, 897, 910, 986
 Armitage, K. B., article, 78
 Arno, S. F., reviewed, 1086
 Arnold, S. J., article, 1014
Artemisia, 956
Artemisia tridentata, 1282
Artibeus jamaicensis, 716
 Ashby, W. C., reviewer, 1083
 Aspen, 265
 Assimilation, 78
 Association, 67, 438
Aster pilosus, 1005

Australia, 207
 Autecology, 154
 Aves, 285, 649, 871, 1137
 Avian population ecology, 871

B

Bacteria, 140, 1271
Bactris utilis, 449
 Bakelaar, R. G., article, 660
 Bancroft, K., article, 1200
 Banks, E. M., ed., reviewed, 868
 Bannister, P., reviewed, 424
 Barrett, G. W., article, 539
Basiliscus basiliscus, 1031
 Basking, 897
 Bats, 716
 Bazzaz, F. A., articles, 1005, 1248
 Bees, stingless, 1123
 Behavior, 242, 285, 539, 708
 Behavior, lizards, 834
 Behavioral ecology, 834
 Best, L. B., article, 351
 Best, M. D., article, 1075
 Biennial, 53
 Big sagebrush, 1282
 Binary discriminant analysis, 108
 Bioenergetics, 539, 742, 779
 Biogeochemistry, 580
 Biogeochemistry of a forested ecosystem (book review), 200
 Biogeography, 1
 Biology diatoms (book review), 1085
 Biomass, 265
 Biomes, 1211
 Birch, 265
 Birds, 235, 438, 526, 693, 1109
 Black cherry, 686
 Black, T. A., article, 1221
 Bobcat of North America (book review), 634
 Body size, 1, 700, 1230
 Body temperature, 897
 Bole decomposition, 580
Bombus spp., 672
 Boonstra, R., article, 242
Boottetix punctatus, 779
 Bormann, F. H., reviewed, 200
 Boschung, H., article, 99
 Box, T. W., reviewed, 1298
 Bradbury, D. E., ed., reviewed, 426
 Breeding systems, 351
 Brian, M. V., ed., reviewed, 1082
 British Columbia, 242
Bromus mollis, 161
 Brood reduction, 1109
 Brood size, 147
 Brower, J. E., reviewed, 636
 Brown, A. V., article, 1091
 Brown, J. H., article, 285
 Browne, R. A., article, 742
 Brugam, R. B., article, 19
 Brush, 489
 Bryant, V. M., Jr., article, 956
 Bryozoa, 257
Bufo, 1014
 Bullfrogs, 789

Instructions to Authors

The pages of *ECOLOGY* and *ECOLOGICAL MONOGRAPHS* are open to research papers dealing with all aspects of ecology and to discussions and essays that develop ecological theory. All papers must be in English.

ECOLOGY considers papers up to 20 printed pages long, including illustrations. *ECOLOGICAL MONOGRAPHS* handles papers which initially are estimated as longer than 20 pages. Three pages of typescript equal approximately one printed page. Illustrations and tabular material together may constitute up to 20% of the total printed pages. **Extensive tabular data, graphs, computer printout, or field notes too costly to publish in the journals can be placed in the national data bank by the Managing Editor. In such cases, a footnote giving details for obtaining microform copy of these deposited data will be printed with the article.**

Manuscripts should be submitted to the Managing Editor. Authors will be notified of receipt of the manuscript. A designated subject-matter editor is responsible for review and acceptance or rejection of the manuscript. Technical correspondence concerning the manuscript may be directed to that editor. Turnaround time for manuscripts is usually a minimum of 90 to 120 days after receipt by the Managing Editor's Office. Delays in obtaining reviews may prolong this period. If a manuscript is returned for revision, the author should submit his revised manuscript to the subject-matter editor within 6 months. Manuscripts undergoing revision for longer than 6 months may (at the discretion of the subject-matter editor) be considered as new manuscripts and submitted again to review. The author should provide a forwarding address if he moves from the return address shown on his manuscript. American authors *must* specify zip code designations. *The CBE Style Manual, Fourth Edition*, available from the American Institute of Biological Sciences for \$12.00, is recommended for details of style. **Manuscripts that do not conform in most respects to the instructions below will be returned to authors for correction before consideration.** Fewer than a third of manuscripts received can be printed.

PREPARATION OF MANUSCRIPT

Write with precision, clarity, and economy; use the active voice and first person whenever appropriate. Every sentence should convey the exact truth as simply as possible.

Type all material (text, tables, quotations, footnotes, literature cited, etc.) **double spaced**, on only one side of standard sized paper approximately 21 by 28 cm. Leave ample margins. Do not use very thin paper, even though overseas mailing is required.

Send the original manuscript **plus 3 copies**. The original and copies must include illustrations. Photocopies are preferable to carbons. Retain at least one complete copy of the manuscript in your files. **DO NOT** submit original India-ink figures due to the risk of loss or damage in the mails.

Titles of articles should be informative and short, usually not more than 10 words. A **running head** not longer than 40 spaces should be provided when the title exceeds this length. Titles with numerical series designations will not be accepted.

Each paper must include an abstract immediately following the title and author's name. Abstracts should record succinctly the essential findings, i.e., they should be informative rather than indicative. Do not include details of methods and results. Tables of contents and terminal summaries are no longer printed. Include, following the abstract, a **list of 6-12 key words** for indexing.

Do not underline any words except scientific names.

Avoid footnotes; most footnote material can be incorporated in the text to the benefit of readers, editors, and printers. Acknowledgments, if extensive, should be placed under a heading just before the Literature Cited.

Literature Cited must be double spaced. Before submitting the manuscript, check each citation in the text against the Literature Cited to see that they are in agreement. The listing should conform in sequencing and punctuation to that in current issues. Consult the *CBE Style Manual* for details.

Authors are to use the metric system for measurements.

Tables must each be **typed double spaced on separate sheets**. Number tables consecutively and give each a short title. Do not rule tables unless essential to avoid ambiguity. Consult recent issues of the journal for style. Never repeat the same material in figures and tables; when either is equally clear a figure is preferable. Avoid unnecessary material, especially tables and long lists of little interest save to the author; this material will be edited rigorously.

Algebraic symbols will appear in italics in print. Formulae to be set separately from the text should not exceed the width of one column. If longer the editors will break the formula into two or more lines. Authors should write their formulae with this in mind and indicate where each formula may be broken. Subscripts and superscripts should be clarified by marginal notes, and subscripts of subscripts should be avoided. The author can insure the accuracy of his formulae and simplify the job of the editor and printer by grouping formulae and preparing them as a figure.

Text figures generally should not exceed 21 × 30 cm. High contrast photographic copies of line drawings, maps, and graphs are essential. Most illustrations will be reduced to a single-column width: letter meticulously using letters large enough to leave characters at least 1 mm high after reduction. *Typewritten lettering within the body of figures is not acceptable.* On figures to be reproduced at single-column width, the height of the lettering should never be less than 1.5% (nor more than 3%) of the width of the figure. Capital letters take reduction better than lowercase. Photographs should be printed for contrast, on glossy paper, unmounted or mounted on light cardboard.

GALLEY PROOF AND REPRINTS

Correct (*do not* revise) both sets of proof identically, *retain one*, and return one promptly, with the edited manuscript, to the Managing Editor. **DO NOT MAKE ANY MARKS on the edited manuscript.** If proof is not returned promptly to the Managing Editor (within 48 hours), the manuscript may be published without the benefit of proof corrections. Mail the reprint order form, showing whether reprints are desired, to the Printer as directed.

COMMUNICATIONS AND SUBSCRIPTIONS

All manuscripts should be submitted to the MANAGING EDITOR (Lee N. Miller, Ecological Society of America, Section of Ecology & Systematics, Cornell University, Langmuir Laboratory, Ithaca, NY 14850). All books (and pamphlets) for review should be submitted to the BOOK REVIEW EDITOR (John P. Witherspoon, Environmental Sciences Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee 37830). The Society is not responsible for manuscripts, books for review, or other unsolicited materials which are sent to it addressed incorrectly and which require forwarding.

Subscription price in the United States, \$42.00 net for complete volumes; Canada, Pan-American, and foreign countries add \$2.00 for postage. Part of volumes are to be had only at the single copy rate. Current single copies, \$7.00. Back volumes, as available, \$50.00 each. Back single issues, \$9.00. All back issues are plus postage. Special rates for active and sustaining members.

Missing numbers will be supplied free when lost in the mails if written notice is received by Duke University Press within one month of the date of issue of next succeeding number.

Remittances for nonmember and institutional subscriptions should be made payable to Duke University Press (Box 6697, College Station, Durham, N.C. 27708).

Remittances for dues should be made payable to the ECOLOGICAL SOCIETY OF AMERICA.

Business correspondence, including nonmember and institutional subscriptions, change of address, back numbers, missing numbers, and discontinuances, should be addressed to Circulation Office, Duke University Press, Box 6697, College Station, Durham, N.C. 27708.

Correspondence regarding member subscriptions and payment of dues in the ECOLOGICAL SOCIETY OF AMERICA should be addressed to the Business Manager, Ralph E. Good, Department of Biology, Rutgers University, Camden, New Jersey 08102.

Requests for permission to use copyrighted material should be directed to the Permissions Editor, Duke University Press, Box 6697, College Station, Durham, N.C. 27708.

STATEMENT OF OWNERSHIP AND MANAGEMENT

ECOLOGY (ISSN 0012-9658) is published six times per year in Winter, Early Spring, Late Spring, Summer, Late Summer and Autumn by Duke University Press (rates listed above). The Office of Publication and the General Business Office are located at Duke University Press, Press Bldg., East Campus, Duke University, Durham, N.C. 27708. The Managing Editor is Dr. Lee N. Miller, Section of Ecology & Systematics, Cornell University, Langmuir Laboratory, Ithaca, NY 14850. The Business Manager is Dr. Ralph E. Good, Department of Biology, Rutgers University, Camden, N.J. 08102. The Owner and Publisher is The Ecological Society of America, Post Office Box 6697, College Station, Durham, N.C. 27708. The Ecological Society of America is a nonprofit organization incorporated under the laws of Wisconsin in 1915. There are no bondholders, mortgagees, or other security holders. POSTMASTER: For undeliverable copies, return postage is guaranteed to Duke University Press, P.O. Box 6697, College Station, Durham, N.C. 27708. Second-class postage paid at Durham, N.C. and additional mailing office.

EXTENT AND NATURE OF CIRCULATION. *Average number of copies of each issue during the preceding twelve months:* (A) total number of copies printed, 9500; (B.1) sales through dealers and carriers, street vendors and counter sales, 0; (B.2) mail subscriptions, 8148; (C) total paid circulation, 8148; (D) samples, complimentary, and other free copies, 38; (E) total distribution, 8186; (F.1) office use, left over, unaccounted, spoiled after printing, 1314; (F.2) returns from news agents, 0; (G) total, 9500. *Actual number of copies of single issue published nearest to filing date:* (A) total number of copies printed, 9501; (B.1) sales through dealers and carriers, street vendors and counter sales, 0; (B.2) mail subscriptions, 8236; (C) total paid circulation, 8236; (D) samples, complimentary, and other free copies, 38; (E) total distribution, 8274; (F.1) office use, left over, unaccounted, spoiled after printing, 1227; (F.2) returns from news agents, 0; (G) total, 9501.

TABLE OF CONTENTS, Volume 59, 1978

CASE, TED J. A general explanation for insular body size trends in terrestrial vertebrates	1-18
BRUGAM, RICHARD B. Human disturbance and the historical development of Linsley Pond	19-36
CUNNINGHAM, GARY L., AND JAMES F. REYNOLDS. A simulation model of primary production and carbon allocation in the creosotebush (<i>Larrea tridentata</i> [DC] Cov.)	37-52
CASWELL, HAL, AND PATRICIA A. WERNER. Transient behavior and life history analysis of teasel (<i>Dipsacus sylvestris</i> Huds.)	53-66
HURLBERT, STUART H. The measurement of niche overlap and some relatives	67-77
KILGORE, DELBERT L., JR., AND KENNETH B. ARMITAGE. Energetics of yellow-bellied marmot populations	78-88
DUESER, RAYMOND D., AND H. H. SHUGART, JR. Microhabitats in a forest-floor small-mammal fauna	89-98
ULTSCH, GORDON R., HERBERT BOSCHUNG, AND MARTHA J. ROSS. Metabolism, critical oxygen tension, and habitat selection in darters (<i>Etheostoma</i>)	99-107
STRAHLER, ALAN H. Binary discriminant analysis: a new method for investigating species-environment relationships	108-116
DYER, DAVID P. An analysis of species dissimilarity using multiple environmental variables	117-125
ROHLF, F. JAMES, AND JAMES W. ARCHIE. Least-squares mapping using interpoint distances	126-132
SMITH, ANDREW T. Comparative demography of pikas (<i>Ochotona</i>): effect of spatial and temporal age-specific mortality	133-139
HABTE, M., AND M. ALEXANDER. Protozoan density and the coexistence of protozoan predators and bacterial prey	140-146
WALSBERG, GLENN E. Brood size and the use of time and energy by the phainopepla	147-153
ANDERSON, MICHAEL G. Distribution and production of sago pondweed (<i>Potamogeton pectinatus</i> L.) on a northern prairie marsh	154-160
TURITZIN, STEPHEN N. Canopy structure and potential light competition in two adjacent annual plant communities	161-167
HANSKI, I. Some comments on the measurement of niche metrics	168-174
PINDER, JOHN E. III, JAMES G. WIENER, AND MICHAEL H. SMITH. The Weibull distribution: a new method of summarizing survivorship data	175-179
WEARY, G. C., AND H. G. MERRIAM. Litter decomposition in a red maple woodlot under natural conditions and under insecticide treatment	180-184
WHITFORD, WALTER G. Foraging in seed-harvester ants <i>Pogonomyrmex</i> spp.	185-189
ANDERSON, D. R., K. P. BURNHAM, AND B. R. CRAIN. A log-linear model approach to estimation of population size using the line-transect sampling method	190-193
HAYES, WILLIS B. Some sampling properties of the Fager index for recurrent species groups	194-196
GREEN, BRIAN. Estimation of food consumption in the dingo, <i>Canis familiaris dingo</i> , by means of ²² Na turnover	207-210
CHESSON, JEAN. Measuring preference in selective predation	211-215
SMARTT, RICHARD A. A comparison of ecological and morphological overlap in a <i>Peromyscus</i> community	216-220
WALLACE, ROBERT L. Substrate selection by larvae of the sessile rotifer <i>Ptygura beauchampi</i>	221-227
NEWELL, SANDRA JO, AND ELLIOT J. TRAMER. Reproductive strategies in herbaceous plant communities during succession	228-234

MARES, MICHAEL A., AND MICHAEL L. ROSENZWEIG. Granivory in North and South American deserts: rodents, birds, and ants	235-241
BOONSTRA, RUDY. Effect of adult townsend voles (<i>Microtus townsendii</i>) on survival of young	242-248
SLATKIN, MONTGOMERY. The dynamics of a population in a Markovian environment	249-256
SUTHERLAND, JOHN P. Functional roles of <i>Schizoporella</i> and <i>Styela</i> in the fouling community at Beaufort, North Carolina	257-264
CROW, T. R. Biomass and production in three contiguous forests in northern Wisconsin	265-273
WOODIN, SARAH ANN. Refuges, disturbance, and community structure: a marine soft-bottom example	274-284
KODRIC-BROWN, ASTRID, AND JAMES H. BROWN. Influence of economics, interspecific competition, and sexual dimorphism on territoriality of migrant Rufous Hummingbirds	285-296
CORNELL, HOWARD, AND DAVID PIMENTEL. Switching in the parasitoid <i>Nasonia vitripennis</i> and its effects on host competition	297-308
GIVENS, ROBERT P. Dimorphic foraging strategies of a salticid spider (<i>Phidippus audax</i>)	309-321
VAN DER VALK, A. G., AND C. B. DAVIS. The role of seed banks in the vegetation dynamics of prairie glacial marshes	322-335
PITT, M. D., AND H. F. HEADY. Responses of annual vegetation to temperature and rainfall patterns in northern California	336-350
SCHEMSKE, DOUGLAS W., MARY F. WILLSON, MICHAEL N. MELAMPY, LINDA J. MILLER, LOUIS VERNER, KATHLEEN M. SCHEMSKE, AND LOUIS B. BEST. Flowering ecology of some spring woodland herbs...	351-366
SCHOENER, A., E. R. LONG, AND J. R. DePALMA. Geographic variation in artificial island colonization curves	367-382
OSMAN, RICHARD W. The influence of seasonality and stability on the species equilibrium	383-399
RUSCH, DORIS A., AND WILLIAM G. REEDER. Population ecology of Alberta red squirrels	400-420
IDSO, SHERWOOD B., RAY D. JACKSON, AND ROBERT J. REGINATO. Extending the "degree day" concept of plant phenological development to include water stress effects	431-433
STARK, NELLIE M., AND CARL F. JORDAN. Nutrient retention by the root mat of an Amazonian rain forest	434-437
HUBÁLEK, Z. Coincidence of fungal species associated with birds	438-442
THOMPSON, JOHN N. Within-patch structure and dynamics in <i>Pastinaca sativa</i> and resource availability to a specialized herbivore	443-448
KLEINFELDT, SALLY E. Ant-gardens: the interaction of <i>Codonanthe crassifolia</i> (Gesneriaceae) and <i>Crematogaster longispina</i> (Formicidae) ..	449-456
LEÓN, JESÚS ALBERTO, AND BRIAN CHARLESWORTH. Ecological versions of Fisher's fundamental theorem of natural selection	457-464
MEENTEMEYER, VERNON. Macroclimate and lignon control of litter decomposition rates	465-472
NILSSON, SVEN G., AND INGVAR N. NILSSON. Species richness and dispersal of vascular plants to islands in Lake Möckeln, southern Sweden	473-480
REED, CATHERINE. Species diversity in aquatic microecosystems	481-488
DeBANO, L. F., AND C. E. CONRAD. The effect of fire on nutrients in a chaparral ecosystem	489-497
FRY, BRIAN, ANTHONY JOERN, AND P. L. PARKER. Grasshopper food web analysis: use of carbon isotope ratios to examine feeding relationships among terrestrial herbivores	498-506
GORMAN, OWEN T., AND JAMES R. KARR. Habitat structure and stream fish communities	507-515

MITCHELL, MYRON J. Vertical and horizontal distributions of oribatid mites (Acari: Cryptostigmata) in an aspen woodland soil	516-525
RICE, JAKE. Ecological relationships of two interspecifically territorial vireos	526-538
STUECK, KAREN L., AND GARY W. BARRETT. Effects of resource partitioning on the population dynamics and energy utilization strategies of feral house mice (<i>Mus musculus</i>) populations under experimental field conditions	539-551
LYNCH, MICHAEL. Complex interactions between natural coexploiters— <i>Daphnia</i> and <i>Ceriodaphnia</i>	552-564
CHAPPELL, MARK A. Behavioral factors in the altitudinal zonation of chipmunks (<i>Eutamias</i>)	565-579
LANG, GERALD E., AND RICHARD T. T. FORMAN. Detrital dynamics in a mature oak forest: Hutcheson Memorial Forest, New Jersey	580-595
